A new beginning

|

UPCOMING 2024

It was the very beginning of the year 2024 and the multiverse went completely dark, there were no signs of life anywhere, there was nothing but a quiet and infinite void. Not a sound was made, but the only thing visible was the small speck of light in the distance. Matthew kept staring, he was lost, he felt as if he were floating in space. His hope to save the multiverse was gone, he lost, (or that's what he thought.)

When suddenly the light began to get darker and he could see different colors through it. Then a great force pulled him into the portal and threw him out, Matthew looked around

It was the year 2024, and the new Academy of Osaka had just opened. The Academy accepted students that had no known guardians as a form of orphanage, but they also had students that did have parents, but these were few. Ren Hashimoto was the former founder of the Academy assisted by his brother Akuma Hashimoto and the rest of their family. Even though Ren's main goal was to create an academy for children without parents .

But his family preferred to make the Academy more focused on parentless children than children only with ancient abilities. The school was in the making since 1984 and was finished forty years later. But in the year 2014 Ren's mother was killed after being attacked by a group of criminals, their father was in so much pain that he decided to stop helping and instead retire up in the mountains where he was no longer seen again.

Ren and his brother were both discouraged after the death and disappearance of their father, later that year Akuma decided to leave and quit helping the build and join a large group of terrorists called the Phantom Demons, Akuma hid his identity from the world by putting on a demon mask and a hood.

Instead Ren got his cousins, uncles and children to help him with the school, about two years Later the Academy had its official grand opening and soon grew largely in size.
